

# Map

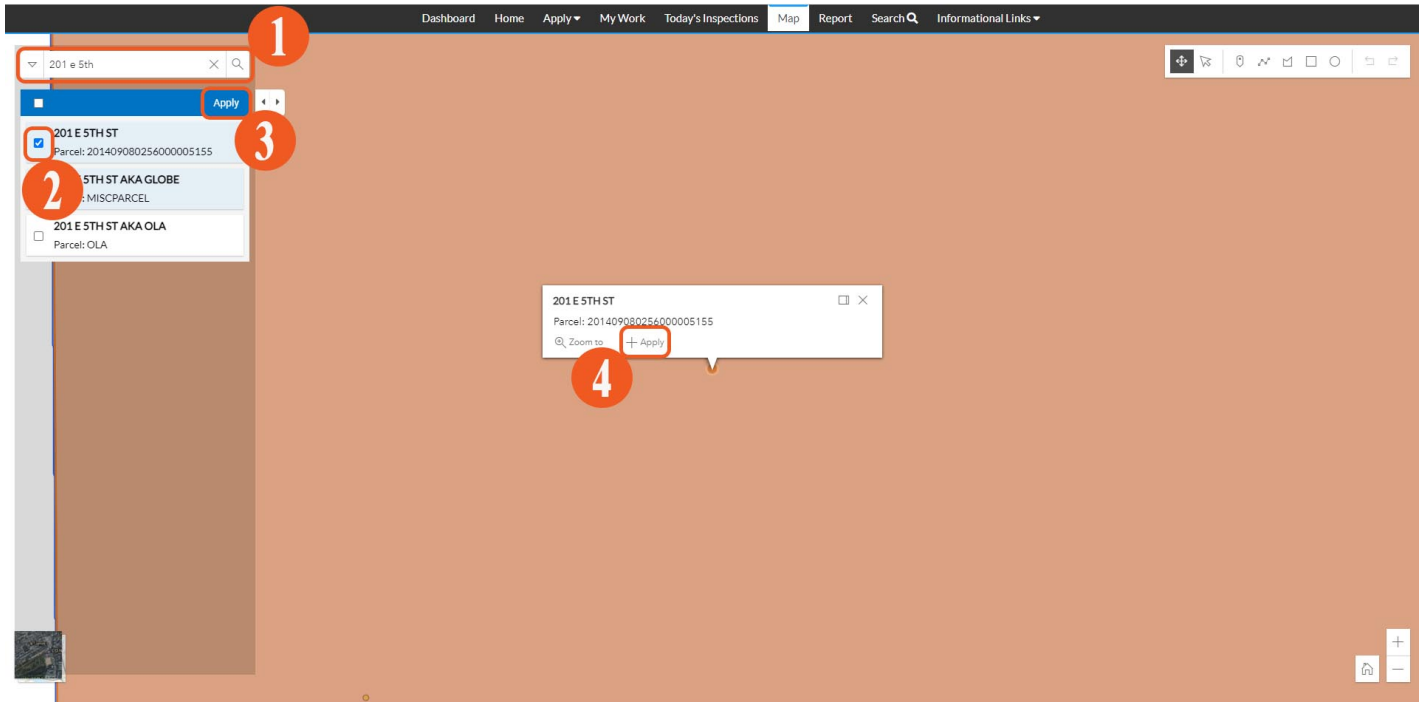

CSS is integrated with powerful GIS software to provide access to mapping tools. Users may apply for permits, plans, inspections, and licenses for properties found using the map.

1. Click **Map** in the top menu bar to access the map screen shown below.

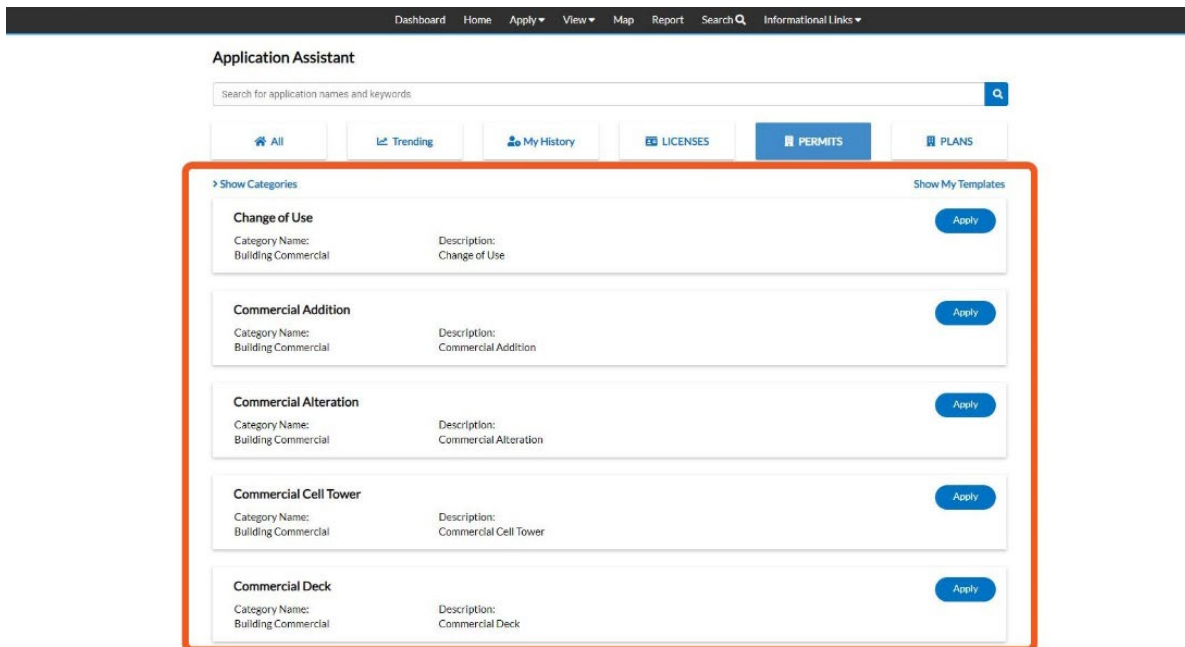

2. Search Box – enter some or all of an address, parcel number, etc. to generate a list of addresses with dropped pins showing their location on the map. Click the search button to execute your search.
3. Draw to Apply – Select from Point, Line, Polygon, or Circle to select regions on the map where you would like to apply for permits or plans.
4. Zoom – To zoom in and out of map click on the + or - buttons.
5. Home – To return to a full screen of the map after zooming in.

To apply using the Map:

1. Search the address or parcel number.
2. Place a checkmark next to the address.
3. Click **Apply** in the top right of the address box
4. Or click **Apply** in the Map address popup box

You will then be directed to the Application Assistant page, and when a permit type is chosen the address will be filled in with the address chosen on the map previously.
